Description: STYLE ORANGE

Nitrile examination glove

orange, non sterile, powder free

PRODUCT DESCRIP	TION						
material	Latex	✓ Nitrile	□ Vinyl	☐ Vinyl-Nitrile- mixture	Polyethy-lene (PE)	☐ TPE	□ cotton
colour	white	☐ blue	black	☐ mint	☐ purple	☐ mix	✓ orange
characteristics	☐ prepowdered	powderfree	sterile	✓ non sterile	☑ ambidex-	fits hand-	☐ Aloe Vera
					trous	specific	inner coating
surface		not textured	□ embossed				
SIZES			(= -)		(22)		
	XS (5-6)	S (6-7)	M (7-8)	L (8-9)	XL (9-10)	XXL (10-11)	XXXL (11-12)
width	≤ 80 mm	80 ± 10 mm	95 ± 10 mm	110 ± 10 mm	115 ± 10 mm	-	-
length	≥ 240 mm	≥ 240 mm	≥ 240 mm	≥ 240 mm	≥ 240 mm	-	-
REGULATORY AFFA	AIRS						
PPE-Regulation (EU) 2016/425	☐ Category I	☐ Category II	☑ Category III	☐ no PPE-article			66
MD-Regulation	☑ Class I	Class II a	☐ Class III	☐ sterile	☐ measuring	no medical	CE

Description: STYLE ORANGE

Nitrile examination glove

orange, non sterile, powder free

## WARNINGS AND SAFETY INFORMATION

storage / expiry date

Store gloves in original packaging in a cool and dry place without additional weight, protect from direct sunlight. Do not store near ozone sources (laser printers, copiers). The actual expiry time in use cannot be specified in general terms, as it depends on the general conditions of use. An individual risk assessment must be carried out in each case. The expiry date - valid for proper storage - is stated on the packaging.

#### use and control

Always use protective gloves only for the intended use and in the correct size. A check/risk assessment must be carried out to ensure that the gloves are suitable for the intended use, as the conditions at the workplace may deviate from those of the type test depending on temperature, abrasion and degradation. Breakthrough times and permeation levels are based on laboratory measurements and are determined using samples taken from the palm of the hand. The actual duration of protection of a glove with a specific substance can vary significantly due to the conditions of use (temperature, abrasion, stretching). In the case of aggressive chemicals, degradation (change in mechanical properties) can be an important factor to consider when selecting chemical-resistant gloves. This information does not reflect the actual duration of protection in the workplace and the distinction between mixtures and pure chemicals. The chemical resistance was determined under laboratory conditions only on the basis of samples from the palm and refers only to the chemicals tested. The situation may be different if the chemical is used in a mixture. The penetration resistance was evaluated under laboratory conditions and refers only to the tested specimen. The degradation results according to EN ISO 374-4 show the change in puncture resistance of the gloves after exposure to the tested chemical.

Before use, the gloves must be checked for holes or damage.

disposal

Used gloves must be disposed of in accordance with the disposal regulations of the local waste disposal company. Unused gloves can be disposed of with household waste.

disinfection

Disinfection is not intended for these gloves and is the responsibility of the user.

warnings/ allergy information Protective gloves are intended for single use only.

This product contains dithiocarbamates, which may cause allergic reactions

donning and doffing instructions
